

The Most Comprehensive Warranties in the Industry

GemThane® Pre-Finished Siding is backed by your choice of two all-inclusive lifetime warranties. In each case, we warrant that the Polymer Coating System will perform as intended so as to protect the wood substrate from the elements. Period. Should this not be the case, GemThane® will gladly supply additional coating or, as necessary, will replace any and all siding that has degraded by virtue of coating failure. We will also cover labour (see below). Unlike most warranties on the market, GemThane® coverage is not limited to a handful of situations such as delamination or blistering, but is very broad in scope.

Solid (opaque) colours are covered for as long as you and your children own the property.

Your choices:

Lifetime Warranty: Every foot of GemThane® Siding comes with a lifetime warranty. Both the coating and the wood are covered with no time limit. In addition, labour coverage is provided for five years. The owner takes care of annual inspection and touches-up any area where the wood is exposed by reason of physical damage, movement or other causes.

Never Lift a Finger Warranty: The enhanced “Never Lift a Finger” Warranty covers coating, wood and labour with no time limit. Even labour is included for the life of the warranty. To qualify for this coverage, the owner retains GemThane® to carry out the annual inspection and touch-up at a reasonable cost.

“Hint of Tint” semi-transparent sidings are covered by a 10 year pro-rated warranty on the coating and 5 years pro-rated on labour.

Please refer to our web site for complete text of all GemThane® Siding System Warranties.

GemThane® Pre-Finished Wood Siding

Real wood siding—
virtually maintenance free!

Economical and easy to install

Outstanding quality—Lifetime Warranty

What Makes GemThane® Pre-Finished Siding So Unique?

Well, first of all, most pre-finished wood is simply factory-painted with ordinary latex stain. This unfortunately results in a wood siding that becomes very high maintenance over time.

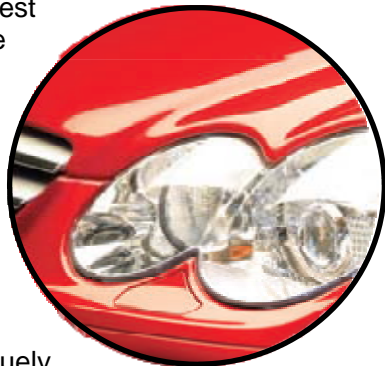

GemThane® is different. GemThane® offers the most technologically advanced wood siding system in the industry. Our siding is encapsulated – front and back – in a shell consisting of two proprietary marine/automotive grade polymer coatings.

The backside coating is robust, water-proof and anti-microbial which eliminates a major cause of siding failure and also saves money during installation (no strapping required). The face of the board is guarded by four separate factory—applied coats of weather - and sun-proof coating. Like the latest

luxury automotive finishes it's fortified with Nano Shield™, – invisible ceramic nano-spheres for outstanding resistance to abrasion and chipping. GemThane® coatings are uniquely

formulated to breathe gently with the seasons, stabilizing the wood and buffering it from the elements, but never smothering it.

The end result? The look doesn't change, but the performance of the siding is simply astonishing! After all, paints and stains merely dry through evaporation; a true polymer coating cures by a chemical reaction.

The Performance Difference

Although deceptively ordinary looking, the GemThane® polymer shell will withstand not only the worst winter storms and brightest summer days but also impact, chemicals, bacterial attack and acid rain! In fact, in lab tests, GemThane® outperforms every other pre-finished wood siding we've tested. What's more, it is the only product that can be power washed back to its original finish without harm.

We are experts in the protective coating industry.

Our parent company, Madison Chemical Industries Inc., has been making coatings for harsh environments for thirty-five years. We have done business from Anchorage to Bahrain and from Sudbury to Taiwan. We've coated wind towers in Oklahoma, water storage tanks in San Antonio and pipelines on five continents.

No stranger to harsh climates. We have applied our polymer coatings expertise to wood siding – resulting in a siding that has no comparison. And we are so confident about the quality of our siding that we offer the most comprehensive Lifetime Warranty in the Industry!

*“GemThane Wood Siding
...a finish so tough,
it will last a life time!”*

We've Got You Covered

GemThane® Pre-finished Real Wood Siding is available in every popular profile and approximately 12 standard colors. And if we don't have the exact color you want, we can custom-match for you.¹

Made right here in Ontario! We offer lead times that are much shorter than most, so you can enjoy your finished project that much sooner.

We work with you to ensure your complete satisfaction. In addition to the siding, we can pre-coat just about every ancillary item as well, from soffits and fascia to window trims and doors. We'll work with your local lumber supply retailer and your builder to make sure you get what you want when you want it.

GemThane® Provides Tremendous Value

On an installed basis, GemThane® Siding is the least expensive real wood siding on the market. How can this be? Well, it's simple; being totally encapsulated and water proof, GemThane® Siding doesn't require any added expense of pre-strapping the building, resulting in labour savings that exceed the extra cost of GemThane® Wood Siding itself.

Everybody wins, especially the home and cottage owner!

(1) A reasonable lab fee applies.
