KEITH DONALDSON, G.M.

July 9, 2008

To whom it may concern;

The spring of 2007 our staff was introduced to the Gemthane Siding System.

We watched their intro demo, with great amazement. What our, then, suppliers of pre-finished siding had to offer was still great, but this product was a step above.

We've had several jobs in the area and are supplying a large building project with the Gemthane product. Applied direct, saving time and labour. A durable finish, next to none.

With their extra warranty of yearly inspections and touch ups, with a re-coat in time, for so little extra cost, seems to make this a no brainer to use.

The trouble we have is getting customers to believe that this is really as good as Gemthane says it is and is affordable when you consider all the factors.

Give us a call, check it out!

Why do people want a product that stays the colour they picked and lasts for their lifetime, because you get what you pay for!

But cheap, get cheap!

Great idea, well introduced, thanks Jean-Guy!

Keith Donaldson
