Dear GemThane Siding System

During the winter of 2007 / 2008 I had the opportunity to install GemThane Wood Siding on the Evanco building, downtown Bracebridge. The siding was installed under the worst winter conditions. The product performed flawlessly regardless of the freezing temperatures. Before we were able to finish installing all of the siding, the building was vandalized with spray paint. Gemthane came to the rescue and supplied a product to remove the spray paint at no charge. To my amazement the spray paint came right off and did not compromise the pre-finished wood siding in any way.

I found that GemThane Wood Siding was very easy to install and the liquid touch up preformed so well that I used GemThane's coatings on the exterior of my own swimming pool.

I am so pleased with this product that I would recommend it to anyone, whether for commercial or residential use.

All of the staff at GemThane Wood Siding System was extremely accommodating and a pleasure to work with.

I am looking forward to using your product again.

Sincerely,

Kal Morrison
