GemThane Siding System  
1964 Muskoka Beach Road  
Bracebridge, ON  
P1L 1V4

Regarding: GemThane Siding System

It's not often that a better mouse trap comes along! Seriously, consider that, like the mousetrap, wood siding has remained virtually unchanged over the years. The introduction of GemThane Siding is a revolutionary moment in the history of wood siding.

GemThane Siding is refreshing, as they supply a unique product. A polymer coated wood siding product just makes plain sense in our ever changing climate. I mean who are we kidding, putting linseed oil based products on our homes and expecting a lifetime of durability. My great-grandfather new better!

GemThane is an obvious choice because they are better than the competition. It pretty much sells itself, just like the mousetrap.

GemThane Siding has the best POP in the wood siding industry today. They have superior sales, shipping and customer service staff, combined with the best product. What a winning combination!

So look out mice, you don't stand a chance.
